

# TECHNIQUES IN MICROBIOLOGY

## A STUDENT HANDBOOK

*John M. Lammert*  
*Gustavus Adolphus College*

San Francisco Boston New York

# CONTENTS

Preface .....	ix
About the Author .....	xi
<b>Unit I – Safety First!</b> .....	<b>1</b>
Safety in the Microbiology Laboratory .....	1
Universal Human Blood and Body Fluid Precautions .....	5
<b>Unit II – Culturing Bacteria and Aseptic Techniques</b> .....	<b>6</b>
Preparing Culture Media .....	6
Sterilization .....	17
The Autoclave .....	17
Dry Heat .....	18
Filtration .....	19
Adjusting the Gas Burner .....	23
Using an Electrical Incinerator (Bacti-Cinerator) .....	27
Aseptic Transfer of Bacteria .....	28
Preparation of the Work Area .....	28
Transferring from a Broth Culture into a Broth Tube .....	29
Transferring from a Broth Culture onto an Agar Slant .....	32
Transferring from an Agar Plate to an Agar Slant .....	35
Transferring Bacteria while Holding Multiple Tubes .....	37
Inoculating an Agar Deep Using the Stab Technique .....	40
Isolation of Bacteria .....	42
Preparing a Streak Plate .....	42
Preparing a Pour Plate .....	48
Preparing a Spread Plate .....	56
Characteristic Features of Bacterial Growth in Culture .....	60
Maintenance and Storage of Stock Cultures .....	63
Short-term Storage of Stock Cultures .....	63
Short- and Long-term Storage .....	63
Growing a Fresh Culture from Frozen Stock .....	65

<b>Unit III – Visualizing Bacteria</b> . . . . .	<b>74</b>
Effective Use and Responsible Care of the Light Microscope . . . . .	74
Viewing Live Microorganisms . . . . .	84
Preparing a Hanging-drop Slide . . . . .	84
Staining Bacteria . . . . .	87
Preparing a Bacterial Smear . . . . .	87
Preparing a Simple Stain . . . . .	92
Preparing a Gram Stain . . . . .	94
Preparing an Acid-fast Stain . . . . .	99
Preparing a Negative Stain . . . . .	105
Preparing a Capsule Stain . . . . .	109
Preparing an Endospore Stain . . . . .	112
Measuring Microscopic Cells . . . . .	117
<b>Unit IV – Enzyme-based Tests for the Identification of Bacteria</b> . . . . .	<b>121</b>
Hydrolytic (Digestive) Enzymes . . . . .	121
Starch Hydrolysis Test . . . . .	121
Casein Hydrolysis Test . . . . .	123
Gelatin Hydrolysis Test . . . . .	125
Fat (Triglyceride) Hydrolysis Test . . . . .	127
DNA Hydrolysis Test . . . . .	129
Utilization of Carbohydrates . . . . .	131
Fermentation of Carbohydrates (Durham Tube) . . . . .	131
Methyl Red Test (Mixed Fermentation) . . . . .	133
Voges-Proskauer Test (Butanediol Fermentation) . . . . .	135
Citrate Utilization Test . . . . .	137
Oxidation-fermentation (OF) Glucose Test . . . . .	139
Degradation of Amino Acids . . . . .	142
Indole (Tryptophan Degradation) Test . . . . .	142
Hydrogen Sulfide (H <sub>2</sub> S) Production Test . . . . .	144
Phenylalanine Deamination Test . . . . .	146
Amino Acid Decarboxylase Test . . . . .	148
Respiration Tests . . . . .	150
Catalase Test . . . . .	150
Oxidase Test . . . . .	152

Miscellaneous Tests . . . . .	157
Triple Sugar Iron (TSI) Agar Test . . . . .	157
Urea Hydrolysis Test . . . . .	159
Litmus Milk Reactions . . . . .	161
Motility Testing . . . . .	164
Coagulase (Tube) Test . . . . .	166
Selective and/or Differential Media . . . . .	168
Blood Agar Plate . . . . .	168
Eosin Methylene Blue (EMB) Agar . . . . .	170
Mannitol Salt Agar . . . . .	172
MacConkey Agar . . . . .	174
Phenylethyl Alcohol (PEA) Agar . . . . .	176
<b>Unit V – Counting Microbes. . . . .</b>	<b>178</b>
Direct Counting with the Petroff-Hausser Chamber . . . . .	178
Preparing a Standard Plate Count of Viable Bacteria . . . . .	183
Using Turbidimetry to Estimate Cell Density . . . . .	191
Determining Bacteriophage Titer by a Plaque Assay . . . . .	198
<b>Unit VI – Measuring the Effectiveness of Antibacterial Chemicals . . . . .</b>	<b>206</b>
Testing Antibacterial Medicines: Kirby-Bauer Technique . . . . .	206
Testing Antiseptics and Disinfectants: Disk Diffusion Technique . . . . .	213
Appendix: Stains and Reagents . . . . .	218
Index . . . . .	223
